

Advantages

- A Versatile Coating Material that Prevents Water Penetration
- Available in Multiple Colours including White
- Versatile Repair Solutions on Roofs, Sealing Nail Heads, Leaking Flashings, etc.
- Effective Concrete Sealing
- Can be used on Galvanized Sheeting, Roofing Felt & Fibre Cement, Graze Cracking
- Exceptional Durability, Flexibility and UV-resistance
- Easy Application, Excellent Adhesion & Quick Drying
- Pesticide Resistant & Suitable for Hospitals & Laboratories

eco shield

eco roof coating

Introducing **Eco Shield**: A Water-Borne Roof Coating with Exceptional UV Reflective Qualities.

Eco Shield is a new generation water based acrylic elastic long life roof and wall coating for use with and without a woven membrane for sealing roofs and walls from water penetration.

Easy Application

UV Reflective

Environmentally Friendly

Waterproofing Solution
