## Ian Dickie Drain & Pipe Cleaning Set

The handy, Ian Dickie Drain Cleaning Set has been developed to offer a highly convenient and cost effective way of clearing blockages in drains and pipes. The sets contain ten high quality interconnecting flexi-steel rods and a selection of sturdy tools that will handle years of demanding use, making it an essential asset to every plumbing and drainage contractor.

### ► Each set contains:

#### SEWER RODS

Manufactured from high tensile spring steel, complete with male and female couplings.  
Size: 10x1m units

#### ASSEMBLY SPANNER

These special spanners prevent damage to the couplings when joining a string of rods.  
Normally used in pairs.

#### DROP SCRAPER

Designed to remain flat when pushed in and open when pulled back. Used for the removal of sand, silt.

#### RUBBER PLUNGER 100mm

Used for final clearing of pipes after the blockage has been removed and brushing has been completed.

#### ROTATING HANDLE

For easy turning of drain rods. Fitted with lockfast joint, to ensure the rods cannot come undone, whichever way the rods are turned.

#### DOUBLE CORKSCREW 89mm

Designed for removal of soft items such as rags and paper.
