

#### TECHNICAL DATA SHEET

Version 1 – 2016 FEBRUARY
THIS ISSUE SUPERSEDES ALL PREVIOUS PUBLICATIONS

## PRODUCT DESCRIPTION

A good alkali resistant primer for porous surfaces

#### PRODUCT USES

 Primes all types of interior and exterior masonry surfaces such as gypsum plaster, brick, concrete, cement, and all types of composite boarding.

## **FEATURES AND BENEFITS**

- Highly resistant to alkali, as found in new plaster.
- Can be over coated with water-based products.
- Seals porous plaster and provides a sound surface for top coating.

# PRODUCT INFORMATION

Appearance Matt Colour White

Binder Type Styrene Acrylic copolymer

Density at 23°C Approx. 1.24

**Solids Content** By weight: Approx. 59%

By volume: Approx. 36%

Packaged Viscosity Viscosity at 23°C: Approx. 70 KU

**Spreading Rate** Approx. 9 to 12m² per litre depending on surface porosity,

profile and application method.

Recommended DFT per coat Min. 25μm. Max. 40μm. Recommended WFT per coat Min. 80μm. Max. 110μm

Flash Point 37°C

#### APPLICATION INFORMATION

Mixing Stir until homogeneous with a flat paddle.

Application Surface conditions Surface Temperature between 10 - 35°C. Relative Humidity

between 10 - 85 % OR 2°C above dew point minimum.

Application methods Brush or roller. Brush preferred to ensure penetration.

Thinner Thinning not recommended. Ready for use after thorough

stirring.

Drying Time Touch dry 4 hour at 23°C.

Recoating Time 18 hours at 23°C (Drying times will be extended during cold,

wet or humid conditions.)

Cleaning of equipment After use, remove as much product as possible, and then

clean immediately with **Dulux Brush Cleaner Degreaser** or

Mineral Turpentine.

Substrates Suitable for cement plaster, gypsum plaster, concrete, fibre

cement and all composition boarding.

Precautions: Do not apply during cold (below 10°C) or wet weather.

Not suitable as a primer for metal surfaces.

Not suitable for direct application to powdery or friable

surfaces whether previously painted or not.

Not designed to withstand natural weathering. It should be recoated in 2 to 3 days. If left uncoated for extended periods, sanding will be required before application of the topcoat.

Coats Required New work 1 coat, a 2<sup>nd</sup> coat may be required on very

absorbent surfaces.

Top Coating Can be over coated with most Dulux or Rockgrip decorative

finishes.

#### SURFACE PREPARATION

Plaster sand should comply with SABS 1090 requirements. Plaster mix must be applied at a minimum thickness of 10mm, curing to a hard and sound finish, free of soft and friable material. MPA strength must comply with SABS 0164-1 (10MPA=2, 6:1 and 5MPA=4:1).

Ensure that surfaces are sound and free from dust, oil, grease, dirt, and debris. Surfaces must be thoroughly dry - no more than 12% moisture content.

#### **NEW SURFACES**

# Cement Plaster (non-friable), Gypsum Plaster, Composite Boarding and Fibre Cement

- Fresh cement plaster should be allowed one week drying for every 5mm thickness; and longer in cold or damp weather.
- Spot-prime metal strips and nail heads with appropriate metal primer.
- For very absorbent surfaces such as gypsum plaster more than one coat Rockgrip
   Plaster Primer could be required to achieve correct binding and sealing properties.

#### Concrete

 Remove any uncured cement, grease, and mould-release agents by high-pressure water blast, or wash with a strong sugar soap/water solution. Rinse off thoroughly with clean water and allow drying.

## PREVIOUSLY PAINTED SURFACES

#### **Old Paint in Poor Condition**

- Completely remove all loose and flaking paint.
- Remove oil, grease dirt or any other contaminants with **Dulux Sugar Soap**/water solution and allow drying.
- Friable surfaces must be removed and repaired.
- Chalked surfaces must be thoroughly brushed or prepared with high pressure water cleaning. NOTE: While this product can be used for sealing exterior chalked or friable surfaces, it will not penetrate thick layers of powdery material. Rockgrip Bonding Liquid, which is un-pigmented, is preferred as it has the ability to penetrate further into the surface.
- Mould instructions. To kill lichen and algae growth, scrub with one of the following solutions: either 4:1 water/chlorine, or 4:1 water/sodium hypochlorite. Ensure that the areas are completely saturated, and allow the solution to react for a minimum of 4 hours. Rinse the complete wall surface thoroughly with clean water and allow drying.
- Prime all exposed areas. For very absorbent surfaces more than one coat Dulux Plaster
   Primer could be required to achieve correct binding and sealing properties.

## **FILLING**

Fill all imperfections with the appropriate **Dulux Pre-Paint** filler and spot prime filled areas **Rockgrip Plaster Primer** once the crack filler has dried properly. Failure to do this will result in uneven sheen levels between the repaired and normal areas.

#### **HEALTH AND SAFETY INFORMATION**

This product contains no added lead. Avoid contact with skin or eyes. Keep out of reach of children. If accidently swallowed, seek medical advice immediately and show this container to the doctor. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes.

If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used. Do not empty into drains or watercourses.

Ensure good ventilation during application and drying. It is recommended to use suitable protective clothing and equipment. To avoid the risk of spillage, always store and transport containers in a secure upright position. Refer to Material Safety Data Sheet for complete information.

#### ADDITIONAL INFORMATION

Packaging	5Lt, 20Lt
	0=1, =0=1

Storage Conditions Store under cool dry conditions away from direct sunlight,

heat and extreme cold.

Disclaimers Colour references are as accurate as printing will allow. For

best colour and sheen consistency, it is advisable to use containers of the same batch number, or to mix different batches together in a large container, or to finish in a corner

before starting a new container.

## TDS STANDARD DISCLAIMER

The recommendations contained herein are given in good faith and meant to guide the specifier or user in accordance with good painting practices. They are gained from our tests and experiences and are believed to be accurate and reliable. No warranty/guarantee is implied by the recommendations contained herein since the conditions of use; application method, substrate and cleanliness of the substrate are beyond Dulux control.

Important Note; Technology may change with time, necessitating changes to this Technical Data Sheet (TDS).

It is the responsibility of the user to ensure that the latest TDS is being used for reference.
