

PRODUCT BROCHURE

TRISEPT

QAC / Gluteraldehyde Based Disinfectant

PRODUCT BENEFITS:

TRISEPT is a Detergent Disinfectant based on a Gluteraldehyde and QAC blend that is effective against a wide range of gram negative and gram positive bacteria and viruses. **TRISEPT** may be applied in the following areas:

POULTRY INDUSTRY

Hatcheries

Egg Rooms, Passages, Setters, Hatchers, Chick Processing and Despatch Areas, Trolleys, Crate and Tray Washers and Equipment.

Farms

Broiler and Breeder Houses.

MEAT INDUSTRY

Meat Abattoirs

PRINCIPAL USES:

TRISEPT is recommended at a use dilution of 1:200 and has many advantages which include the following:

- Detergent Disinfectant and therefore it cleans as well as sanitizes.
- Effective against a wide spectrum of microorganisms and viruses.
- Non-corrosive to metals normally encountered in the Poultry Hatchery Industry at use dilution.
- Not affected by hard water.
- Biodegradable.
- May be applied through high and low pressure foaming and spray equipment or crop sprays.

MICROBIOLOGICAL DATA

TRISEPT when tested according to a Standard Test Method killed 99,999% of the following bacteria within 5 minutes at a dilution of 1:200.

- Escherichia coli.
- Staphylococcus aureus.
- Pseudomonas aeruginosa.

The recommendations contained herein are based on laboratory tests and in-field use experience, and are to the best of our knowledge, accurate. Since terms and conditions of actual use are beyond our control, all recommendations are made without warranty, express or implied.

TRISEPT is also effective against the following viruses at a 1:200 dilution.

- Newcastle Disease Virus.
- Infectious Bursal Disease Virus.
- Foot and mouth (FMD) virus.

GENERAL DESCRIPTION:

For typical and physical properties, refer to the Material Safety Data Sheet.

- Form : Clear foaming liquid

- Colour : A hazy foaming liquid
- Odour : No odour
- Specific gravity : 1.03
- pH of concentrate : 4.0 – 5.0
- Solubility : Infinitely soluble in water
