

Woodoc Stain Concentrate Specification Sheet

Typical Application:

For interior and exterior use. To tint clear Woodoc Solvent-Based Sealers and perfect for all decorating needs, both indoor and outdoor.

Product Features:

- Contain transparent iron oxides, which absorb ultra-violet rays.
- The transparent oxides also highlight the wood's natural grain giving it an uncommon warmth and beauty.
- Woodoc Stain Concentrates are available in eight natural wood finishes: Meranti, Imbuia, Oak, Oregon, Teak, Rosewood, Ebony and Yellowwood.
- Complete how-to-use instructions on label.

Application Note:

Because the natural colour and absorbency of woods differ, the appearance attained with Woodoc Stains can differ on application. It is recommended that a trial application on a similar piece of timber be carried out first. Three coats should be applied for the desired result. If the resulting colour is too light, more tint can be added. If too dark, just add more clear Woodoc Sealer. Either way your colours turn out exactly the way you choose! If however, the desired colour is achieved after one or two coats, clear Woodoc Solvent-Based Sealers should be used to finish the job. Woodoc Stains should only be used mixed into one of the clear Woodoc Solvent-Based Sealers.

No: WDstain/005

Dated: 12/04/17

Name:

Woodoc Stain Concentrate
